CONTENTS VOLUME 63 SEPTEMBER 1983

page 1 ANDERSON, R. G. W., ORCI, L., BROWN, M. S., GARCIA-SEGURA, L. M. and GOLDSTEIN, J. L. Ultrastructural analysis of crystalloid endoplasmic reticulum in UT-1 cells and its disappearance in response to cholesterol

21 HOOPS, H. J. and FLOYD, G. L. Ultrastructure and development of the flagellar apparatus and flagellar motion in the colonial green alga *Astrephomene gubernaculifera*

43 TRAUB, P. and VORGIAS, C. E. Involvement of the N-terminal polypeptide of vimentin in the formation of intermediate filaments

69 SAKAI, M. and SHINAGAWA, A. Cyclic cytoplasmic activity of non-nucleate egg fragments of *Xenopus* controls the morphology of injected sperms

77 HUSCHTSCHA, L. I. and HOLLIDAY, R. Limited and unlimited growth of SV40-transformed cells from human diploid MRC-5 fibroblasts

101 WOLF, H. and GINGELL, D. Conformational response of the glycocalyx to ionic strength and interaction with modified glass surfaces: study of live red cells by interferometry

113 DONATH, E. and GINGELL, D. A sharp cell surface conformational transition at low ionic strength changes the nature of the adhesion of enzyme-treated red blood cells to a hydrocarbon interface

125 SHEFFIELD, E., LAIRD, S. and BELL, P. R. Ultrastructural aspects of sporogenesis in the apogamous fern *Dryopteris borreri*

135 HORNER, H. A. and MACGREGOR, H. C. *C* value and cell volume: their significance in the evolution and development of amphibians

147 NAKORNCHAI, S., SATHITUDSAHAKORN, C., CHONGCHIRASIRI, S. and YUTHAVONG, Y. Mechanism of enhanced fusion capacity of mouse red cells infected with *Plasmodium berghei*

155 GALLAGHER, J. T., SPOONCER, E. and DEXTER, T. M. Role of the cellular matrix in haemopoiesis. I. Synthesis of glycosaminoglycans by mouse bone marrow cell cultures

173 BENNETT, M. D., HESLOP-HARRISON, J. S., SMITH, J. B. and WARD, J. P. DNA density in mitotic and meiotic metaphase chromosomes of plants and animals

181 LACKIE, A. M. Effect of substratum wettability and charge on adhesion *in vitro* and encapsulation *in vivo* by insect haemocytes

191 SHELDON, J. M. and DICKINSON, H. G. Determination of patterning in the pollen wall of *Lilium henryi*

209 NILSSON, J. R. and VAN DEURS, B. Coated pits and pinocytosis in *Tetrahymena*

223 MCBRIDE, N. K. and THURSTON, C. F. The complexity of poly(A)$^+$ RNA in the alga *Chlorella fusca*

233 CONNOR, N. S., AUBIN, J. E. and SODEK, J. Independent expression of type I collagen and fibronectin by normal fibroblast-like cells

245 WESTFALL, J. A., BRADBURY, P. C. and TOWNSEND, J. W. Ultrastructure of the dinoflagellate *Polykrikos*. I. Development of the nematocyst–taeniocyst complex and morphology of the site for extrustion

263 COLOMBO, R. Actin in *Xenopus* yolk platelets: A peculiar and debated presence

271 FELTKAMP, C. A. and VAN DER WAERDEN, A. W. M. Junction formation between cultured normal rat hepatocytes: An ultrastructural study on the presence of cholesterol and the structure of developing tight-junction strands

287 HARPER, P. A., BROWN, P. and JULIANO, R. L. Fibronectin-independent adhesion of fibroblasts to extracellular matrix material: partial characterization of the matrix components

303 PICTON, J. M. and STEER, M. W. Membrane recycling and the control of secretory activity in pollen tubes

311 SCHUSTER, F. L. and TWOMEY, R. Calcium regulation of flagellation in *Naegleria gruberi*
